

360 Project Demo. Record

NAME: _____ ID: _____ NAME: _____ ID: _____

Start with an empty disk for level-1; Use samples/PROJECT/mydisk for level-2

FUNCTION	Full	Partial	Description of Problems
----------	------	---------	-------------------------

===== LEVEL 1 =====

startup: mount_root

ls

pwd

cd

mkdir

rmdir

creat

link

symlink

unlink

chmod

===== LEVEL 2 =====

RUN project on mydisk

ls /X; cd /X; mkdir thisIsAlongNewdir; ls; _____

cat /Y/bigfile: _____

cp /Z/hugefile newhuge; ls; cat newhuge _____

NOTE: if can't do cat, cp: show individual commands of

open

write

read

close

===== LEVEL 3 =====

mkdir /mnt

mount FS /mnt; mount (show what's mounted) _____

```
cd /mnt; mkdir newdir; cd newdir; pwd (MUST show /mnt/newdir/) _____
```

```
cd ../../; pwd (MUST show /) _____
```

```
umount FS
```

check FS under Linux:

```
sudo mount -o loop FS /mnt; ls /mnt (MUST show newdir still exist)_____
```

```
-----  
permission : try to rmdir dir AND unlink file NOT belong to proc:  
-----
```
